DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-7, 11-17, 19, and 22 drawn to a system for monitoring of communicable state of the client, classified in class 709, subclass 224.
- II. Claims 8-10, 18, 20, 21, and 23 drawn to a system for delivering messages to different destination depends on the state of the client, classified in class 709, subclass 206.

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility because the system for communicating monitored client communicable information to a information transmission device can be used in a system where the information transmission apparatus *does not* transmit the undelivered information to the relay device if a transmission of the undelivered information to the client terminal is not received by the client device. Invention I, in this instance case, has separate utility because the system comprising the detecting means for detecting that a client terminal is in a communicable state with a network, when the client terminal connects to another information transmission device through the network and uses a service provided through the connection. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper. The search for the invention of Group I would require considering class 711, subclass 100 (Storage Accessing and Control), while the search for the invention of Group II would not.

Applicant is advised that the reply to this requirement to be complete **must include an election** of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Conclusion

A shortened statutory period for response to this action is set to expire **one month (not less than 30 days)** from the mail date of this letter. Failure to respond within the period for response will result in **ABANDONMENT** of the application (see 35 U.S.C. 133, M.P.E.P. 710.02, 710.02(b)).
